TERMS OF ACCEPTANCE

When a person seeks chiropractic health care and we accept a person for such care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is important that each person understand both the objective and the method that will be used to attain it. This will prevent any confusion.

Adjustment: A Chiropractic Adjustment is the specific application of forces to facilitate the body’s correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body’s innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body’s innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

I, _____ have read and fully understand the above statements.

INFORMED CONSENT FOR TREATMENT

Physicians and other health care providers are required to obtain your informed consent before starting treatment.

I _____ do hereby give my consent to the performance of chiropractic treatment that may consist of manipulations/adjustments, physical medicine, exercises and traction. I understand that the manipulations/adjustments will involve movement of the joints and soft tissues that is considered to be one of the safest and most effective forms of therapy for musculoskeletal problems.

I am aware that there are possible risks/complications associated with my treatment. Tests have been performed to minimize these risks. I freely assume the risks of treatment after having been informed of the possible risks/complications associated with my treatment as follows:

- Soreness: It is common to experience muscle soreness during treatment
- Uncomfortableness: Temporary symptoms (dizziness, nausea) can occur, but are rare.
- Fractures/Joint Injury: Underlying physical defects, deformities or pathologies (osteoporosis) may cause susceptibility to injury.
- C.V.A.: Cerebral vascular accidents from chiropractic adjustments are extremely rare.

Treatment Results

I understand there are benefits associated with treatment including decreased pain, improved mobility and function and reduced muscle spasms. However, I also understand there is no guarantee that I will achieve these benefits during my care, as the practice of medicine, including chiropractic, is not an exact science.

Alternative Treatment Available

Reasonable alternatives to treatment have been explained to me including rest, home therapy, exercises medication and possible surgery.

I agree to treatment by my doctor and such persons of the doctor’s choosing, which may include Associates, interns, preceptors, Chiropractic Assistants, etc and hereby provide my informed consent for treatment.

I HAVE READ OR HAVE HAD READ TO ME THE ABOVE EXPLANATION OF CHIROPRACTIC TREATMENT. ANY QUESTIONS REGARDING TREATMENT HAVE BEEN ANSWERED TO MY SATISFACTION.
